

March 16, 2020

To All of our East Families:

As promised, we have been following the CDC and Health Department updates to protect our families. Today, a new set of recommendations came out that were more stringent than the last, including the recommendation that no groups larger than 10 gather together. At this time, we feel that for the safety of our families, we have suspended all operations at East. This includes all games and practices. The Board will continue to monitor the situation and put together plans for the season for when the CDC lifts its ban in May. We will be in communication over the coming weeks as the situation develops.

Sincerely,  
David McDonald  
President, East Youth Baseball
